

Merlion School – Translational Medicine | 18 - 22 Nov 2019 | One°15 Marina Club, Singapore

*“**Translational Medicine (TM)** encompasses the continuum from identifying clinical unmet needs to development of new therapies for human diseases. By enabling people to develop research through this continuum, we will move critical scientific insights into tangible benefits for patients. ”*

The Merlion School is tailored to individual needs, and is based on learner-centered discussions and mentoring by internationally recognized leaders. Skills garnered from this course will help individuals and team members to bridge the divide between concept and patient.

All-in-One Experience!

360 degree learning in TM

Analyse the business, scientific and regulatory aspects of TM, and develop critical thinking skills to approach and explore the challenges.

Get Real!

Examine case studies, and develop creative problem-solving strategies and novel skills to build new kinds of teams.

Master New Skills

Hone your ability to communicate effectively across broad audiences.

Develop specific skills to Translational Medicine.

Opportunities to Network

Be inducted into the Eureka Network upon graduation - having direct access to a vast network of accomplished peers, leaders and partners in TM - all building bridges and closing gaps to form a global community of TM professionals
